

UNITED STATES NUCLEAR REGULATORY COMMISSION

REGION IV 1600 EAST LAMAR BLVD ARLINGTON, TEXAS 76011-4511

September 3, 2013

Mr. Eric W. Olson, Site Vice President Entergy Operations, Inc. River Bend Station 5485 US Highway 61 St. Francisville, LA 70775

SUBJECT:

MID-CYCLE ASSESSMENT LETTER FOR RIVER BEND STATION

(REPORT 05000458/2013006)

Dear Mr. Olson:

On August 14, 2013, the NRC completed its mid-cycle performance review of River Bend Station. The NRC reviewed the most recent quarterly performance indicators (PIs) in addition to inspection results and enforcement actions from July 1, 2012 through June 30, 2013. This letter informs you of the NRC's assessment of your facility during this period and its plans for future inspections at your facility.

The NRC determined the performance at River Bend Station during the most recent quarter was within the Licensee Response Column of the NRCs Reactor Oversight Process (ROP) Action Matrix because all inspection findings had very low (i.e., Green) safety significance, and all PIs indicated that your performance was within the nominal, expected range (i.e., Green). Therefore, the NRC plans to conduct ROP baseline inspections at your facility.

In our assessment letter dated March 5, 2012 (ML 120610414), the NRC identified a cross-cutting theme in the Safety Conscious Work Environment component of Environment for Raising Concerns. This theme resulted from the issuance of a Confirmatory Order dated August 22, 2011, that involved discrimination. The cross-cutting aspect was related to behavior and actions that encourage free flow of information related to raising nuclear safety issues such that personnel raise nuclear safety issues without fear of retaliation [S.1(a)]. At that time, the NRC determined that a substantive cross-cutting issue did not exist because the NRC did not have concerns with the actions you committed to take to address the theme. At the end of this assessment period, an inspection of your actions related to the Confirmatory Order was in progress and had not been completed. Therefore, the cross-cutting theme in S.1(a) will remain open until the NRC verifies by inspection that you have fully implemented the actions described in the Confirmatory Order.

The enclosed inspection plan lists the inspections scheduled through December 31, 2013. Routine inspections performed by resident inspectors are not included in the inspection plan. The inspections listed during the last nine months of the inspection plan are tentative and may be revised at the end-of-cycle performance review. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes. This inspection plan does not include security related inspections, which will be sent via separate, non-publicly available correspondence.

In accordance with 10 CFR 2.390 of the NRCs Rules of Practice, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

Please contact me at (817) 200-1144 with any questions you have regarding this letter.

Sincerely,

Jessie Quichocho, Chief (Acting)

Project Branch C

Division of Reactor Projects
